ENGINEERING CYBERNETICS

Soviet journal of computer and systems science

CONTENTS FOR 1980

Number 1

	English Page	Russian Page
CONTROL PROBLEMS AND OPERATIONS RESEARCH		
E.N. Kazantsev and M.Kh. Prilutskiy: The Planning Problem for Models of Two-Stage Stochastic Production Systems	1	3
Yu.A. Zak and V.M. Yakhno: Sequential Optimization Algorithms in Problems of Discrete Stochastic Programming	6	10
Ye.Ya. Gabovich and I.I. Melamed: An Approach to the Analysis of Discrete Problems Regarding Lengths of Permutations	13	17
V.L. Zak: Avoidance of Several Pursers by an Inertial Object	21	26
V.M. Sineglazov: Synthesis of Controls of Linear Stochastic Systems that are Optimal with Respect to Speed of Action and Expenditure of Fuel	26	32
V.A. Malinov and S.V. Shil'man: Adaptive Estimation of the Trend of Parameters of Complex Systems	32	38
ARTIFICIAL INTELLECT AND ROBOTS		
D.Ye. Okhotsimskiy, A.K. Platonov, and V.Ye. Pryanichnikov: A Method for Modeling of a Robot Moving in Space	40	46
QUEUEING AND RELIABILITY		
G.P. Basharin, V.A. Kokotushkin, and V.A. Naumov: On a Method of Equivalent Replacements of Computation of Fragments of Communication Networks for a Digital Computer. II	48	55
G.V. Vorob'yev and A.G. Yakovitskiy: The Problem of Processing Information in a Person-Machine Complex	54	62
R.S. Sudakov: On Interval Estimation	54	67
L.M. Abol'nikov and M.Ya. Postan: On Duality Relationships in Queueing Systems with Group Appearance, Group Servicing, and Feedback	64	78
R.B. Rubal'skiy: A Model of Servicing Distant Objects	71	86
V.A. Gadasin: Estimation with Consideration of Reliability of Efficiency of Hierarchical Systems with Complex Subordination	77	93
G.S. Pashkovskiy: The Optimal Choice of Controllable Parameters for Systems of Built-In Control	84	101
THEORY OF AUTOMATA AND COMPUTER SYSTEMS		
V.V. Danilov and B.P. Podkopayev: Use of the Spectral and Autocorrelation Properties of Logic Functions for Synthesizing Combination Schemes on Maitra's Cascades	95	112
V.A. Ivanov, V.V. Kafarov, V.L. Perov, and A.A. Reznichenko: On Algorithmization of the Start-Up of Chemical Productions	104	121
V.V. Lipayev and S.S. Sobkin: The Effectiveness of Deterministic Planning of a Computational Process	110	128

AUTOMATIC CONTROL		
B.N. Petrov, V.I. Vasil'yev, and Yu.M. Gusev: Synthesis of Nonlinear Automatic Control Systems by the Method of Generalized Linearization	111	134
S.N. Kalinovich, G.M. Markelov, L.A. Miroshnichenko, and V.A. Rayevskiy: Synthesis of a System of Control of Orientation of the Satellite Ekran (Screen) in a Regime of Stabilization Along a Channel of Pitching	116	140
G.S. Britov and L.A. Mironovskiy: A Criterion for Redundancy of Dynamic Systems	116	149
P. Varlaki and N.S. Raybman: An Estimate of the Degree of Nonlinearity of a Dynamic Object	123	156
Yu.G. Bondaros: Algorithms of Suboptimal Estimation of the State of Systems Disturbed by White Noises	127	161
AUTOMATION OF SCIENTIFIC INVESTIGATIONS		
V.N. Kharchev: A Sequential Algorithm for Choosing the Optimal Instant for Instant for Terminating an Observation Process in a Conflict Situation	128	170
A.F. Starikov: Certain Features of Resonance Regimes of a Regulator in Systems with Distributed Parameters	135	178

Number 2

PROBLEMS OF CONTROL AND OPERATIONS RESEARCH		
G.S. Pospelov, V.L. Ven, and P.I. Livintsev: Practical Construction of a Dialogue System	1	3
P.L. Buzytskiy and G.A. Freyman: The Application of Analytical Methods in Combinatorial Problems	8	12
A.N. Golodnikov: A Method of Solving Certain Stochastic Problems with Partially Defined Distribution Function	14	19
I.G. Pospelov: On the System Analysis of a Developing Economy: An Analytic Investigation of an Immitational Model	20	26
M.S. Nikol'skiy: On Guaranteed Estimates in Differential Games with Vector Criterion of Quality and Fixed Time	30	37
ARTIFICIAL INTELLECT AND ROBOTS		
M.B. Ignat'yev and V.I. Petrov: Computer Planning of Mobile Equipment Hauling	38	44
N.A. Lakota, Ye.V. Rakhmanov, and V.N. Shvedov: Trajectory Control of an Elastic Manipulator	45	53
QUEUEING AND RELIABILITY		
A.O. Vaganov and M.A. Fedotkin: Study of Queueing Systems with Instantaneous Reswitching of a Device on the Basis of an Inquiry of One of Several Conflict Flows	53	60
G.L. Brodetskiy: On the Question of Optimal Organization of Recording Intermediate Information in the Case of Random Failures of a System	61	69
G.N. Cherkesov: Semi-Markovian Models of Reliability of Multichannel Systems with Unreplenishable Reserve of Time	65	74
COMPUTER SYSTEMS AND THEORY OF AUTOMATA		
A.V. Maksimenkov: Asynchronous Parallel Computations in a Modular Multiprocessor Computer I. Program Models	79	88
V.V. Danilov, A.N. Zhirabok, F.V. Filippov: An Identifying Experiment with an Automaton in the Presence of an Increasing Number of States	86	96
A.A. Lopukhov and R.P. Chaptsov: Equivalent Transformations of a System of Sequences	91	102
P.N. Bibilo and S.V. Yenin: Joint Decomposition of a System of Boolean Functions	96	108

	English Page	Russian Page
I.P. Belyayev, V.M. Kapustyan, and B.G. Medvedev: Combinatorial Memory	102	114
AUTOMATIC CONTROL		
A.M. Batkov and S.T. Grinchenko: The Problem of Synthesizing an Algorithm of Control of a Linear Dynamic System with Random Parameters	103	128
B.G. Mel'nikov: On the Problem of Determining an Optimal System	109	134
V.P. Loginov and N.D. Ustinov: Estimation of the Accuracy of Determination of the Vector of the State of a Linear Dynamic System	115	141
A.F. Vereshchagin, V.S. Medvedev, and V.P. Puzanov: Algorithms for Optimizing the Trajectories of Motion in the Case of Controllable Search for Objects	115	146
S.N. Kalinovich, L.A. Miroshnichenko, and V.A. Rayevskiy: The Initial Regimes of Operation of a System of Orientation and Stabilization of a Geostationary Satellite	122	154
AUTOMATION OF SCIENTIFIC RESEARCH		
A.A. Zhiglyavskiy and Ye.V. Sedunov: Methods of Optimal Planning of Regression Experiments When There is a Systematic Error	123	164
BRIEF COMMUNICATIONS		
S.V. Tuyev: The Placing of Points of Collection of a Distributed Resource on a Straight Line	131	172

Number 3

CONTROL PROBLEMS AND OPERATIONS RESEARCH		
F.L. Chernous'ko: Optimal Guaranteed Estimates of Indeterminacies with the Aid of Ellipsoids. I	1	3
Yu.P. Ivanilov: Process Representation of Imitational Systems. I	10	12
V.L. Ven and P.I. Litvintsev: Trial Design of a Dialogue System. II	20	24
V.V. Kafarov, V.P. Meshalkin, and Nguyen Suan Nguyen: An Algorithm for Compact Transformation of the Informational Structure of the Matrices of Mathematical Models of Complex Technological Systems	27	32
ARTIFICIAL INTELLIGENCE AND ROBOTICS		
A.A. Kobrinskiy: On the Theory of Manipulation Systems (Mechanical Properties)	36	42
QUEUEING AND RELIABILITY		
A.A. Shakhbazov: Connections between Stationary Distributions and the States of Systems with Allowance for the Priorities in the Case of Failures	37	51
A.I. Mikov: Determination of the Characteristics of Waiting in a Single-Line System from the Moments of the Initial Distributions	43	57
V.V. Bazhenov: Problems of Control of Localization of Processes of Propagation in a Plane	50	64
Ye.K. Degtyarev and Ye.K. Kurako: Investigation of the Distribution of the Operative Memory of a Computer with the Aid of Semi-Markov Processes	58	73
N.V. Lubkov: A Recurrent Procedure of Simulating Failures in the Estimation of Reliability of Complex Systems	58	80
A. Takhirov: Joint Distributions of Certain Characteristics of a Single-Line Queueing System with Bounded Queue	62	84
AUTOMATON THEORY AND COMPUTATIONAL SYSTEMS		
A.P. Goryashko and A.S. Nemirovskiy: Reliable Calculations in a Universal Automaton Consisting of Unreliable Elements	63	92

	English Page	Russian Page
Ye.F. Kurenkov, Yu.Ye. Sedakov, and V.V. Shcherbakov: Simulation of Computers on Cyclindrical Magnetic Domains. I. The Language of the Simulation	73	103
M.G. Millerova: A Method of Constructing an Organizational Structure of a System for Controlling Technological Processes of a Continuous Type	74	110
A.V. Maksimenkov: Asynchronic Parallel Calculations in a Modular Multiprocessor Computer. II. Realization of the Model	74	117
P.N. Bibilo and S.V. Yenin: Decomposition of a Boolean Function with Minimum Number of Significant Arguments of the Subfunctions	75	123
DATA PROCESSING		
A.G. Tartakovskiy: Sequential Detection of Signals with Measurement of Their Parameters	82	130
AUTOMATIC CONTROL		
A.A. Krasovskiy: Optimal Trajectory Control in an Inertial Coordinate System	90	138
V.L. Azarov, L.N. Lupichev, and G.A. Tavrizov: On the Characteristic Equations of Linear Distributed Control Systems	96	144
A.I. Ruban: The Sensitivity of Continuous Systems Described by Integrodifferential Equations of the Volterra Type	107	157
V.P. Perov: Synthesis of Systems with Discrete-Continuous Time	113	165
AUTOMATION OF SCIENTIFIC RESEARCH		
A.N. Yefimov and V.M. Kuteyev: Investigation and Simulation of Certain Properties of Elite Groups	125	177
BRIEF COMMUNICATIONS		
S.P. Vasil'yev and A.P. Seledkin: Synthesis of the Efficiency Function in Multicriterion Problems of Decision Making	126	186
A.Ya. Matov and N.F. Tishchenko: Mathematical Models of Computational Systems with Priority Failure in the Servicing	130	190
V.A. Ivnitskiy: On a Single-Channel Queueing System with Dependent Parameters and Limited Queue	130	194
A.Ya. Tetel'baum: On the Number of Classes of Isotopic Arrangement of a Graph	135	200
V.A. Zhilin: Estimates of the Continuity and Accuracy of Approximation of Priority Queueing Systems	137	202
Ya.A. Furman: On Disruption of Tracking of a Finite Automaton with Random Transitions	139	204
I.A. Sholpo: Hierarchical Games with Ordered Outcomes	144	209

Number 4

CONTROL PROBLEMS, SYSTEMS ANALYSIS, AND OPERATIONS RESEARCH		
F.L. Chernous'ko: Optimal Guaranteed Estimates of Indeterminacy with the Aid of Ellipsoids. II	1	3
Yu.P. Ivanilov: The Nucleus of an Imitational System (Simplified Variant)	9	12
P.I. Litvintsev: Planning of Computations in a Dialogue, Long-Term Planning System	10	21
V.N. Ushakov: On the Problem of Constructing Stable Bridges in a Differential Game of Approach and Avoidance	16	29
M.I. Alekseychik and G.V. Kalyuzhnyy: The Theoretical Basis and an Algorithm for the Procedure of Relaxation for Problems of Quasiconcave Programming	24	37

	English Page	Russian Page
ARTIFICIAL INTELLIGENCE AND MANIPULATION IN ROBOTICS		
M. Vukobratovich and D. Stokich: Modeling and Synthesis of Control of a Manipulator for Mechanical Assembly	31	44
F.M. Kulakov and T.N. Smirnova: On Efficient Organization of a Computational Process in the Solution of Problems in Mechanics as Applied to Manipulational Robots	31	55
A.V. Kalyayev, V.P. Noskov, and Yu.V. Chernukhin: An Algorithm for a Controlling Structure of a Transport Robot	39	64
D.Ye. Okhotsimskiy, Ye.Yu. Zuyeva, M.M. Komarov, S.A. Mirer, Yu.A. Sadov, and V.A. Sarychev: Computer Modeling of an Integral Robot Which Stacks Up Parts According to a Drawing	47	73
V.A. Bogdanov, V.S. Gurfinkel', and V.G. Ostapchuk: Modeling of the Anthropomorphous Control of the Process of Foot Transfer of an Exoskeleton for Paraplegics	54	81
QUEUEING AND RELIABILITY		
V.A. Ivnitskiy: Determination of the Characteristics of a Flow of Events Generated by a Piecewise-Continuous Markov Process	61	89
V.V. Marbukh: On a Single Line Queueing System with Allowance for the Reswitching Time	68	97
I.V. Pavlov: A Fiducial Approach in the Estimation of the Characteristics of Complex Systems from the Results of Tests	73	102
L.B. Groysberg: A Fiducial Approach in the Case of Interval Estimation of the Reliability of Complex Systems	73	110
G.V. Kolosok and Ye.I. Ushakov: Determination of the Distribution Functions of the Time of Failure-Free Operation of Elements from Observations of Their Operation in a Configuration of Sequential Systems	81	118
V.F. Kuznetsov: Planning of Renewal Operations with Allowance for the Transfer of Means	86	123
B.I. Shustov: Certain Properties of a Deficit Function for a Periodic Model of Control of Stores	92	130
COMPUTER SYSTEMS AND AUTOMATA		
V.I. Varshavskiy, V.B. Marakhovskiy, V.A. Peschanskiy, and L.Ya. Rozenblyum: Asynchronic Processes. I. Definition and Interpretation	93	137
I.M. Fomenko: Synthesis of an Automaton Controlling the Correctness of Functioning of a Discrete Device	98	143
AUTOMATIC CONTROL		
B.N. Petrov and P.D. Krut'ko: The Inverse Problems of Dynamics of Controlled Systems. Linear Models	102	147
V.I. Lovchakov and A.A. Fomichev: Synthesis of Control Systems for a Certain Class of Nonlinear Objects with Lag	111	157
AUTOMATION OF SCIENTIFIC RESEARCH		
V.K. Klochko and Ye.N. Churakov: The Branch-and-Bound Method in a Problem of Restoration of Functions from Discrete Readings of Them	112	166
S.E. Vorobeychikov and V.V. Konev: On Sequential Identification of Stochastic Systems	121	176
Yu.M.-L. Kostyukovskiy and A.I. Nefelov: On the Connection between the Speed of Convergence of a Process of Identification and the Sensitivity of the System to Errors in the Initial Data	127	183

Number 5

	English Page	Russian Page
MANAGEMENT PROBLEMS, SYSTEM ANALYSIS, AND OPERATIONS RESEARCH		
F.L. Chernous'ko: Optimal Guaranteed Estimates of Indeterminacies with the Aid of Ellipsoids. III	1	5
O.G. Alekseyev: An Algorithm for Solving a Covering Problem	8	12
A.S. Rykov: Simplex Methods of Direct Search	12	17
V.V. Solodovnikov: The Problem of Automation of the Planning of Control Systems and Methods of Automatic Control Theory	18	23
G.A. Kengerlinskiy: Principles of Construction of the Structures of Decentralized Systems of Data Processing	25	31
L.D. Dryuchenko: Algorithms for Search of a Plan that is Optimal as Regards Cost on a Prediction Graph	34	41
V.Yu. Lebedev: A Program System for Solving Linear Optimization Problems	43	50
ROBOTS, MANIPULATORS, AND ARTIFICIAL INTELLIGENCE		
Kh.K. Brutyan, Yu. I. Klykov, and L.V. Mkrtchyan: A Method of Purposive Formation of Classes of Situations	44	58
V.I. Gorodetskiy and S. A. Shishov: Simulation of Distorted Perception of Three-Dimensional Scenes	51	66
QUEUEING AND RELIABILITY		
A.V. Pechinkin: Stationary Probabilities in a System with Discipline of Advantageous Distribution of a Process	52	73
G.I. Falin: Not Completely Accessible Schemes with Allowance for Repeated Calls	56	78
N. S. Ayupov and V.A. Ivnitskiy: Asymptotic Expansion for the Moments of the Sojourn Time in an Admissible Set of States of a Certain Class of Single-Line Queueing Systems	64	86
A.M. Andronov: Algorithm for Finding Optimal Strategies in Controlled Semi-Markov Birth-and-Death Processes	67	90
G.L. Brodetskiy: On Optimal Control of a Data-Handling Process in the Case of Random Failures. I	71	95
I.A. Ushakov: Estimation of Reliability from the Results of Truncated Observations	76	101
T.A. Leksich and S. Nikolich: Computer Systems and Automata Predictive Expansion of Switching Functions	79	104
N.G. Topol'skiy: The Method of Hierarchical Decomposition and Synthesis of Digital Automata	85	112
V.V. Danilov and A.N. Zhirabok: Checking Test for an Asynchronous Potential Automation Coded in Terms of Columns of the Transition Table	85	123
V.A. Val'kovskiy: Practical Methods for Improvement of Parallel Programming Structures	86	130
V.I. Varshavskiy, V.B. Marakhovskiy, V.A. Peschanskiy, and L.Ya. Rozenblyum: Asynchronous Process II. Composition and Matching	92	138
V.P. Malinovskiy and I.M. Fomenko: The use of Declarative Knowledge for Solving Certain Problems in Technological Diagnostics	97	144
AUTOMATIC CONTROL		
B.N. Petrov and P.D. Krut'ko: Inverse Problems of the Dynamics of Controlled Systems. Nonlinear Models	102	149
O.A. Babich: On the use of the Method of Characteristics in Problems of Optimal Control of Deterministic Systems	108	156
Yu.I. Yaaksoo: On the Theory of Discrete Inverse Systems	116	165
A.B. Danilin, V.Yu. Rutkovskiy, and I.B. Yadykin: On the Accuracy of Adaptive Identification with a Tunable Model	120	169
V.P. Ponomarenko: Investigation of a Model of a Correlational-Extremal System of Tracking of the Delay of a Noisy Signal	127	177

	English Page	Russian Page
A.P. Batenko: Optimization of Terminal Controls by the Method of Gradual Improvement	134	185
S.A. Rudnev and N.V. Faldin: On Broadening the Field of Application of the Conditions for Stability of Relay Systems	141	193
AUTOMATION OF SCIENTIFIC RESEARCH		
K.V. Isayev: On Current Planning of a Testing Signal Bounded in Amplitude for Identification of a Certain Class of Dynamic Objects	142	197
A.V. Anisimov, Yu.A. Belov, I.I. Lyasho, and V.L. Makarov: Testing of Correctness of Mathematical Models of Complex Information-Measuring Systems	146	202
S.K. Savin: Estimation of the Quality of Functioning of Complex Technological Systems with Allowance for the Characteristics of the Accuracy	147	209

Number 6

CONTROL PROBLEMS, SYSTEMS ANALYSIS, AND OPERATIONS RESEARCH		
A.N. Yefimov and V.M. Kuteyev: Rank Procedures for Control of the Evolution of Elite Groups	1	3
I.A. Malyshev and Yu.I. Palagin: Mathematical Modelling of Multidimensional Random Fields	9	13
A.A. Goryachev and V.M. Sergeyev: Negotiations as a Problem of Discrete Programming	17	22
V.I. Brutyan: Optimal Synthesis of Linear Markov Controlled Systems in the Case of Continuous and Discrete Incomplete Observations	21	27
ROBOTS, MANIPULATORS, ARTIFICIAL INTELLIGENCE		
G.A. Anikina, M.G. Polyakov, L.N. Romanov, and V.Ya. Tsvetkov: On the Extraction of an Image Contour with the Help of Linear Trained Models	29	36
N.D. Krut'ko and G.V. Pis'mennyy: Algorithms for Control of the Force of Compression of the Grip of a Manipulator	36	44
V.A. Malyshev: A Method of Constructing Program Motions of a Manipulator	41	50
QUEUEING AND RELIABILITY		
G.I. Falin: Repeated Calls in Structurally Complex Systems	46	55
V.A. Nagonenko and A.V. Pechinkin: On a Large Load in a System with Discipline of Preferential Sharing of a Processor	52	62
V.N. Kaminskiy: Optimization of Closed Stochastic Networks with Exponential Servicing	57	68
Ye.I. Gordiyenko: A Model of Control of a Servicing Object in a Territorially Distributed System. I	65	77
O.I. Demidovich and Yu.Ye. Malashenko: On a Model of Control of Flows in Networks	72	86
I.A. Ushakov: An Approximate Method of Calculating Complex Systems with Renewal	76	91
E.V. Dzirkal and A.E. Shura-Bura: Calculation of the Reliability of a Redundant Group with Unreliable Reswitching and Incomplete Monitoring	84	100
G.L. Brodetskiy: On Optimal Control of a Process of Processing Information in the Case of Random Failures, II	91	108
COMPUTER SYSTEMS AND AUTOMATA		
V.P. Bityutskiy: Realization of Boolean Functions by Planar Schemes	92	113
G.N. Povarov: Simple Methods of Comparing Boolean Functions	94	116
A.I. Petrenko, A.I. Telel'baum and B.L. Shramchenko: Search for an Optimal Path of a Graph in a State Space	97	119

	English Page	Russian Page
AUTOMATIC CONTROL		
V.V. Solodovnikov and V.I. Tumarikin: Synthesis of an Automatic Control System in an Admissible Set of Dynamic Characteristics of a Control Object and of Controlling Subsystems	103	126
N.I. Ringo: Observability of Bilinear Discrete Systems	112	136
K.A. Pupkov and Ye.B. Frolov: An Algorithm for Testing the Attainability for a Certain Class of Nonlinear Systems	115	140
T.S. Belousova and B.I. Shakhtarin: On Rotary Motions in a Third-Order Dynamic System	123	149
AUTOMATION OF SCIENTIFIC RESEARCH		
V.A. Yezhov and L.V. Tarasov: Coherent Optical Spectrum Analysis and Correlation Processing of Signals Recorded with the Help of Combined Modulation	131	156
